

I watched 60 Minutes, Flashpoint, local News and the Internet. So I am very disappointed that no treatment is reported for viral infections. There are a number of very effective treatments for any viral infection. They are currently being used in China. The treatment consists of intravenous Vitamin C in doses up to 24 grams per day, or inhaling Ionic Silver via the HaloFogger or nebulisers. Medical Research has demonstrated that these treatments are very effective so why are they not promoted by the Media and the World Health Organisation and Politicians. Is there a hidden agenda perhaps to reduce the aged population? Or is the Media waiting to obtain huge sums of money from advertising when a vaccine becomes available? What is even worse is that these treatments are being labelled as "Fake News" and/or "false information". I have already had a message from FaceBook Fact Checker stating that I am providing false information, so not sure how long this will remain visible on the internet.

Prevention

- Stay away from people who are sick
- Don't touch your face.
- Remain at home as much as possible.
- Cough or sneeze into a tissue, (don't use more than once) bin it.
- Disinfect frequently touched surfaces such as door handles etc.
- If sick wear a face mask to prevent spreading it.
- Wash hands frequently with soap and water or alcohol based sanitiser for a minimum of 20 seconds.

- Avoid crowds.

Treatment Methods (1, or 2, or 3, or 4)

(1) 500mg ascorbic acid (chewable vitamin C) can be sucked on every 1/2 hour for prevention or for Treatment. If loose stools develop, take it hourly or two hourly. Rinse mouth with water after dissolved to prevent tooth enamel erosion. As a result of megadose vitamin C more hydrogen peroxide is produced to assist the immune system to defend against viral or bacterial infections.

(2) Use a nebuliser or diffuser add ionic silver solution to saline water. Use hourly or as needed to bring relief and clear the viral infection. Can use a nasal sprayer to inhale the above solution if one has no nebuliser or diffuser.

(3) To 100ml saline add 5ml pharmaceutical grade 3% hydrogen peroxide use the solution in a nebuliser. This can be done hourly or even more depending on the severity of the symptoms. Hydrogen peroxide is what God designed your immune system to do to defend against viral and bacterial infections.

(4) Rife Frequency Generators can be used to provide the same frequencies as the virus which destroys them. Note however that viral frequencies change as they can mutate within 3 minutes. All atoms, molecules, and microbes have their own specific frequencies due to the electrons circulating them. Spooky2 (strange name) has the best generators at a very reasonable price and they have the largest database in existence. The software is FREE so one can make informed decisions.

I have also been informed by a reliable authority that Doctors in China are also keeping their patients as warm as possible since it is susceptible to heat. Furthermore they have been applying hot ginger tea. This is made by adding a teaspoon of dry ginger powder to a cup of boiling water. It can also be applied to the chest and back as a poultice.
